The entire log will be uploaded to LoTW as quickly as possible after the end of the operation, or if possible, also during the DXpedition. Direct or Bureau QSLs may also be requested using the M0URX Online QSL Request Service (OQRS). There is also a link from the 4W6A Web site at:

CIS DX QPSK63 CONTEST

The European PSK Club has the honor to invite radio amateurs from all over the world to participate in the 2011 CIS DX QPSK63 Contest. The objective of the contest is to establish as many contacts as possible between radio amateurs around the world and radio amateurs in the "Commonwealth of Independent States" by using the QPSK63 mode. The Commonwealth of Independent States (CIS) is a regional organization whose participating countries are former Soviet Republics, formed during the breakup of the Soviet Union. Everybody can work everybody for a QSO and multiplier credit.

The CIS DX PSK Contest is held every year on the third weekend of September. This year it starts at 12:00 UTC on Saturday, September 17th, and ends at 12:00 UTC on Sunday, September 18th. Every participant should send a correct RSQ report and his/her four-digit DXDA number. An example of an exchange for W6EPC from the State of California is 599 2053. Maritime and aircraft mobile stations should send an RSQ report and four zeros, such as 599 0000. You can find your correct DXDA number at the corresponding list:

They will be on air as much as possible, mainly on 20 and 40 meters. Laurie requests, "Please do not ask for other bands etc, we are travelling in a very small two seater plane and as it is, have to make many trips to the Island just to get ourselves and equipment there. There are no trees to attach antennas to, and we are not allowed to use the lighthouse for attaching antennas." If possible, they will upload logs to eQSL and

LoTW while there, if not it will be done when they return home. For details on the lighthouse, see:

MOST WANTED DX SURVEY (2011) NOW AVAILABLE

Carl, N4AA, editor of "QRZ DX/The DX Magazine", has announced that the "2011 Most Wanted DX Survey" is now available in the September/October issue of DX Magazine and also on-line at:

http://www.dxpub.com/dx_survey2011.html

He states, "Although you can use the form from the magazine, it is preferable that you use the on-line method to respond. It makes things so much easier when we tally the results after October 15th. Remember the overall results will be published in the Jan/Feb 2012 issue of "The DX Magazine" and the world-wide results will be posted to the Web site around January 15th,

2012, as well. The breakdown by mode/Low Bands will be published in the Mar/Apr 2012 issue of the magazine."

PLEASE NOTE: Carl adds, "South Sudan is not on the form this time. Although there was an operation from there this year (ST0R), it is not expected that the confirmations will be available before the October 15th deadline for it to be included in this survey. At this point in time, South Sudan will be considered to be 'WANTED' by everyone. Obviously it will be included on the survey next year."

PG540, THE NETHERLANDS (Special Event)

Look for special event stations PG540BUFFALO or PG540BUFFALO/J to be active between October 10th and November 3rd. PJ4, BONAIRE (Update)

Excerpts from a bulletin (No. 2) put out by some members of the Provins ARC F6KOP team announce that the team will activate **Bonaire (SA-006, WLOTA L1279)** as PJ4C between January 12-23rd, 2012. The team originally was going to activate something possibly in Africa, Asia and Pacific, but after a few month of hard work, they had to cancel many of them for different reasons (mostly security related to the last events in the world). Also, some were just too expensive for their team. Finally, they chose to go to Bonaire (PJ4) because they found a place to accept all their equipment and operators. Thanks to the help of Peter, PJ4NX, everything has been organized very fast. Their goal will be 80,000 QSOs in 11 days, and maybe get the RTTY world record back. Operations will be on CW, SSB and RTTY, with as least 6 stations, 24 operators, and on the air 24 hours a day. The team members are experienced operators and include: Franck/F4AJQ (team leader), Peter/PJ4NX, Dave/K4SV, Gabriele/I2VGW, Bill/N2WB, Nobert/DJ7JC, Heye/DJ9RR, Guenther/OE3GCU, Karl/ OE3JAG, Eric/ON7RN, Henri/F1HRE, Yann/F1NGP, Jimmy/F4DLM, Michel/F5EOT, John/F5VHQ, Jean-Luc/F6BIV, Alain/F6ENO, Joel/F6JMT, Jean-Paul/F8BJI, Bernard/F9IE, Rein/PA0R, Kenneth/OZ1IKY, Gerard/F2VX, Francis/F5QF and Tony/F8ATS. More details and updates can be found at:

Activity will be on all HF bands, 160-10 meters using CW, SSB and RTTY, running two high power stations using wire antennas, verticals and a Spiderbeam. QSL via their home callsigns, direct or by the Bureau. Logs will be uploaded to
